OLEKSII NAIDIUK

Hello!. I have about 2 years experience in developing parsers, APIs and automation scripts for marketing. Actually I am just trying to make life easier for people around me and my own using technologies. I will be glad to help you too!

My mostly used technologies:

Python, Selenium, Zennoposter, Burpsuite
aiohttp, requests, telethon, aiogram, BeautifulSoup4, XPATH, REGEX,
asyncio, multithreading, multiprocessing, unittest

RESTful API development:

Fastapi, SQLAlchemy, Sqlite, Postgresql, Redis

OS and tools

Ubuntu, Windows, bash, cmd

CI/CD

docker/docker-compose, git, github

Idioms that i stick to

SOLID, DRY, KISS, YAGNI, TDD

As a hobby I keep a telegram channel where I save all the materials that helped me in the development and which will potentially help others

<https://t.me/pyscraping>

WORK EXPERIENCE

- Sep 2020 - Feb 2021 **Content-manager**
[Feleton, Kyiv](#)
Creating and posting content on marketplaces
- Sep 2023 - Jul 2023 **Automation developer**
[Feleton, Kyiv](#)
The main job was to create tools for automated content posting. Successfully completed parsers and automation scripts for instagram, rabota.ua, work.ua, telegram and whatsapp
- Sep 2023 - present **Automation developer**
[Softum.io, Kyiv](#)
Developed a tool for automated emailing and an api to speed up content delivery.
